Summary

I am a passionate full stack web and app developer with the passion to learn and solve real world problems

I have 5apps published under my name and I have handled some others for some clients

I am a fast learner and can easily adapt to changes

I'm proficient in PHP/Javascript/Python/ Flutter / Firebase and a couple of frameworks which include React Js,Next js,Vue Js, ExpressJs,Laravel, Codeigniter,Django,NodeJS

Favorite Programming Language: Dart

one thing I believe is in getting the job done on time!!

From time to time, I create YouTube videos around web development and programming related stuffs and always love getting feedbacks. [Currently Monetised Youtuber]
♂# Passionate about building secure products with a strong background in secure coding practices.
Learns all things about technology.
♂# Passion for building insanely great products that can solve people's problems at scale.
Open Source Believer and Contributor; I am also interested in building software using secure coding techniques.

Experience

Full-stack Developer

Camsol.io

Aug 2022 - Present (8 months)

-Working in a team of highly skilled developers building solid User interfaces with ReactJS and Taiwind
- Building Mobile User interfaces using Flutter and firebase with strong focus on security and delivery on time
-Building Userflows for better understanding of the project with various team members
- Building and assisting team members easily adapt to the project at hand
- Working with GetX and Bloc across projects for state management

Software Development Lead

Sikatronics Group

Dec 2022 - Present (4 months)

-Analyzing projects
-Coming up with excellent User interfaces
-Managing issues related to development
-Drafting architecture of the applications
-Getting detail feedback

-Producing regular updates on daily basis to suit customer.

-Make vast use of tests to ensure excellent working of application.

-Manage project from development till publishing

Software Engineer

Tekstedia Ltd

Aug 2021 - Present (1 year 8 months)

-Started here by working on a mobile application which is still to be published and integrated apis

-Fixed Bugs related to a previous existing application.

-Worked hand in hand with the Founder here to deliver high scale projects

Youtuber and Content Creator

YouTube

Feb 2020 - Present (3 years 2 months)

- One thing about me as a developer is that i love sharing knowledge

- I started Youtubing in February 2020 where i released my first video

- I used my channel and trained 20+ people programming from scratch

- After a year i got to 1k+ subscribers after impacting them

- I am currently above 2k+ subscribers and have monetized my youtube channel

- I have deep passion and love for technology so from time to time i create videos here related to programming

- It was hard at the start but worth it

Full-stack Developer

Sikatronics Group

Feb 2021 - Dec 2022 (1 year 11 months)

-Started off as a Designer building high scalable user interfaces.

-Implementation of high fidelity interfaces using React js + Django.

Full Stack Developer & Mobile App Developer

Creantiq

Feb 2022 - Oct 2022 (9 months)

-Collaborated and built highly responsive web interfaces with react js and consumed apis built in Django

-Implemented mobile designs with focus on pixel perfect interfaces

- Worked with Flutter and firebase implementing User interfaces and constructing backend with Firebase to enable realtime communication

- Used GetX for state management

- Started as a web developer and later on switched to a mobile developer.

- It was a great experience working here cause i greatly improved as a developer

Frontend Developer

Bridge Labs

Feb 2022 - Aug 2022 (7 months)

- Worked in a team of Talented Developers and focused on implementing User interfaces

- Built custom Applications using PHP from scratch

- Integrated Etherscan which is a block explorer and analytics platform which lets you view and analyze assets, balances and transactions on the Ethereum network.
- Built plugins and documented how it works for better understanding
- Built high scale backend Api with Nodejs
- It was a great experience for me working at Bridgelabs

Frontend Web Developer
Wodarr Technologies
Aug 2020 - Feb 2021 (7 months)
-Worked with senior developers to bring to life ideas and designs
in to materialization
-Learned core development skills.
-Complete detailed programming and development tasks for
front-end development.
- Earned a certificate of participation

Network Associate
Cisco Networking Academy Buea
Nov 2018 - Feb 2021 (2 years 4 months)

Education

University of Buea
Bachelor's degree, Computer Engineering
2019 - 2023
Specialty in software Engineering

All nations
Advanced level, Science

Ccas kumba
Ordinary level

Cisco Networking Academy
CCNA

Licenses & Certifications

Adobe xd certificate - Udemy

Bronze honour of IAAC2020 - International Astronomy and Astrophysics Competition
F-2020-E66A15B6FB5
